CAREER OBJECTIVE

Innovative, task-driven professional with experience in web design and development across diverse industries. Equipped with record of success in consistently identifying and providing the technology needs of companies through ingenious innovations. Proficient in front-end and back-end, writing and testing codes, troubleshooting simple/ complex issues, and implement new features based on user feedback.

EXPERIENCE

Current Employer

Network System Engineer

Tilray.Inc , August 2018 – current   *Nanaimo,BC*

- Manage software development lifecycle of our company website along with the user portal and payment method.

- Design and install full network, server, and storage solutions.

- Managed network segmentation, including VLAN, NAT, advanced routing and Qos.

- Oversee internal and external network security compliance, auditing, and remediation.

- Administer and support Domain Controller and Active Directory.

Freelance

Software Developer

Ornaz.Inc , freelance /September 2017 – June 2018

- Establish and interactive and dynamic website that guarantees high traffic, page views and maximum user experience.

- Developed full-stack web applications which processed, analyzed, and rendered data visually.

- Administer the full life-cycle of software development for 12 critical projects of the company with 100% on time delivery and 7% under budget.

- Liaised with back end developers, front end developers, quality assurance testers, and Director as needed.

- Managed time-sensitive updates, including content changes and database upgrades.

- Used – Javascript, HTML/CSS/MongoDB.

Front-End Developer

Kodan Solutions, freelancer / June 2014 – August 2015

- Revamped company's website via deploying responsive design & facilitated an increase in mobile user by 40%.
- Implementing mobile first approach on refactoring the existing website.
- Leveraging responsive web frameworks to complete deliverables ahead of schedule.
- Creating modular, responsive template using modern CSS techniques and JavaScript libraries.
- Collaborating with designers to ensure designs were efficient and technically sound.

PROJECTS

IGNITE Live Hosted-click me.

Just like IMDB for movies, we have Ignite for Video games.

- Built a responsive web app using **React** and **React hooks** with UI designed beautifully to display all new, upcoming game and popular games.

- For **State management**, **Redux** is working seamlessly, making an **API** call using Axios and updating state easily for us.

- CSS is there but styled-components and Framer-Motion are just too good and fit perfectly just like it was meant to be.

- Also, Rawg.io APIs are fun to use. Check it out on my Github page.

- Used- React, Javascript, HTML/CSS, Redux and Axios

COVID-19 TRACKER Live Hosted-click me.

Web Application to provide live coverage of COVID-19 cases accross the globe.

- Responsive web app using React and React-hooks to display the live data.

- Libraries like ChartJS are used to develop the charts based on the data and the countries.

- WHO updated and approved API is used to fetch the live data.

- Used: React, Javascript, Express, HTML/CSS and Axios.

"1% better every day!"
